PROFESSIONAL SUMMARY

4 YoE in Frontend Technologies: React, Redux, MUI, HTML/CSS, JavaScript, TypeScript, RTL, Git,

EXPERIENCE

LRS

Frontend Developer Contractor

Feb 2023 - Present

- Built and maintained a Data Logging React PWA for NOAA, contributing to new features from inception to completion.
- Developed a real-time React Echart for marine sightings, integrating data from NOAA scientists with GPS feeds to calculate sighting coordinates.
- Participated actively in requirements gathering and documentation with stakeholders, prioritizing customer-centric development.

Loyal Health

Software Engineer, Frontend

Mar 2022 - Feb 2023

- Implemented new features for a React-based Patient Management App using a test-driven development approach with React Testing Library.
- Contributed to the development of a styled-components UI library, enhancing code reusability and consistency throughout the application.
- Developed React Query Custom Hooks for server data synchronization and caching.

Limosys LLC

Frontend Developer

Jun 2021 - Mar 2022

- Created web and mobile UI applications with React and Webview.
- Established standards for scalable React state management and mentored other developers in its implementation.
- Developed a Material-UI component library for UI consistency and scalability.

Logie Inc

Intern Frontend Developer

Mar 2021 - Jun 2021

- Collaborated in production to create a robust e-commerce Live Streaming application.
- Developed responsive web components and pages using React.

TWG Companies

Intern Software Engineer

Nov 2020 - March 2021

- Developed a landing page with login and registration forms using React.
- Added mobile responsiveness features to web pages.
